Sulzer acquires Stamixco disposable plastics mixer business

Dear customer,

We are pleased to inform you that as of June 30, 2020, Sulzer Ltd. has acquired the business activities on disposable plastic mixers from the Swiss company Stamixco.

The range of disposable plastic mixers consists of mixers based on the SMX or X-Grid as well as the helix geometry. The addition of this unique mixing technology to Sulzer's capabilities will strengthen and seamlessly complement our current portfolio of plastic static mixers by providing our customers a solution for adhesives applicators that are challenging to mix.

The integration of the Stamixco plastic mixers' portfolio in Sulzer Mixpac will reinforce our position as the key global supplier to the Adhesives and Sealant Industry with a comprehensive and innovative range of primary packaging, mixers and dispensers.

Sulzer commits to providing a smooth transition in serving you as continued valued customers of these products.

As a result of the acquisition, the order placement and invoicing processes will change for you.

A new order entry point as well as a new bank account for payment transfers to Sulzer Mixpac AG should be used for all future transactions. Therefore, we kindly ask you to make the necessary adjustments in your ERP and vendor systems as soon as possible to ensure a continuously smooth order process.
